## SUMMARY

Motivated and fast-learning Computer Engineer with expertise in C#, Java, and JavaScript. Strong skills in full-stack development and software testing. Actively seeking roles as a Full-Stack Developer or Software Test Engineer. Known for problem-solving abilities and strong interpersonal skills. Passionate about continuous learning, with interests in basketball and fitness.

## EDUCATION

<b>Computer Engineering</b> Bahcesehir University	<b>02/2023</b> Istanbul
<b>Computer Programming</b> Bolu Abant İzzet Baysal University	<b>07/2016</b> Bolu
<b>Web Design</b> Erkan Avcı Technical College	<b>07/2014</b> Istanbul

## PROFESSIONAL EXPERIENCE

<b>Full-Stack Developer Bootcamp</b> <b>Patika.dev</b> Completed an intensive bootcamp focused on full-stack development, with hands-on experience in both front-end and back-end technologies. For the backend, I gained proficiency in Java, including web frameworks, database management, and API integration. Additionally, I developed projects using JavaScript, React, and SQL, building a solid foundation in full-stack development.	<b>02/2024 to 09/2024</b>
<b>IT Assistant Specialist</b> <b>Zorlu Enerji</b> I effectively followed up and resolved employee requests regarding software and hardware problems. I took a role in completing the process of the data classification project.	<b>01/2023 to 01/2024</b> <b>Istanbul</b>
<b>Intern</b> <b>Yapı Kredi Bank</b> During the Yapı Kredi Young Branch Internship Program, I enhanced my software development skills through 'Agility and Scrum 101' and 'Machine Learning' training. Additionally, I gained valuable insights into design thinking and data storytelling, which have strengthened my approach to problem-solving and data-driven decisions.	<b>09/2021 to 10/2021</b> <b>Istanbul</b>
<b>Intern</b> <b>Aygaz</b> I developed a .NET MVC project using ASP.NET Identity for managing membership operations. The project involved creating modules for user registration, login, password reset, and authorization. Database operations were integrated with SQL Server to ensure secure storage of user data.	<b>07/2021 to 08/2021</b> <b>Istanbul</b>

## PROJECTS

<b>Veterinary-System</b> The veterinary management system project is an API developed for a veterinary clinic to manage its own business. <b>Technologies:</b> Java, Spring Boot, Spring Data JPA, Hibernate, Maven
<b>Tourism Agency System</b> It is an application developed to digitalize the daily operations of the Tourism Agency and optimize customer reservation processes. <b>Technologies:</b> Postgre, JavaFX, Java
<b>MineSweeperGame</b> It is a text-based Minesweeper game in Java language. <b>Technologies:</b> Java
<b>LibraryApp</b> The Library Management project is a Spring Boot system for managing books, members, and transactions. It includes adding, updating, deleting, and viewing books, as well as handling member management and book borrowing/returning. <b>Technologies:</b> Java, Spring Boot, Spring Data JPA, and PostgreSQL, React and Docker
