SUMMARY

Motivated and fast-learning Computer Engineer with expertise in C#, Java, and JavaScript. Strong skills in fullstack development and software testing. Actively seeking roles as a Full-Stack Developer or Software Test Engineer. Known for problem-solving abilities and strong interpersonal skills. Passionate about continuous learning, with interests in basketball and fitness.

EDUCATION

Patika+ 6-month Fullstack Web Development Bootcamp

Graduation year: 2024

- Accepted into and graduated from one of Turkey's most selective and intense bootcamps.
- Developed various projects on React, Java Spring Boot, MySQL, and CSS frameworks (e.g., Tailwind, Bootstrap, Material-UI) technologies.

Bahcesehir University, Istanbul, Turkey

Graduation year: 2023

- Bachelor of Science in Computer Engineering.

Bolu Abant İzzet Baysal University, Bolu, Turkey

Graduation year: 2016

- Associate Degree in Computer Programming.

Erkan Avcı Technical College, Istanbul, Turkey

Graduation year: 2014

- Technical High School in Web Design.

PROFESSIONAL EXPERIENCE

Zorlu Enerji, Istanbul, Turkey

January 2023 - February 2024

IT Assistant Specialist

- I effectively followed up and resolved employee requests regarding software and hardware problems.
- I took a role in completing the process of the data classification project.

Yapı Kredi Bank, Istanbul, Turkey

September 2021 - October 2021

Intern

- Enhanced software development skills through trainings like 'Agility and Scrum 101' and 'Machine Learning'.
- Gained insights into design thinking and data storytelling, improving problem-solving and data-driven decision-making.

Aygaz, Istanbul, Turkey

July 2021 - August 2021

Intern Software Development Process

- Developed a .NET MVC project using ASP.NET Identity for managing membership operations.
- Created modules for user registration, login, password reset, and authorization with SQL Server integration for secure data storage.

PROJECTS

Mini Telecom CRM System

- Developed a scalable Telecom CRM backend using Spring Boot with layered architecture.
- Modeled complex entity relationships (OneToMany, ManyToOne) for real-world telecom scenarios.
- Modeled complex entity relationships (OneToMany, ManyToOne) for real-world telecom scenarios).
- Implemented package lifecycle management (activation, termination, switching logic).
- Ensured clean architecture by enforcing service-to-service communication instead of direct repository access.
- Ensured clean architecture by enforcing service-to-service communication instead of direct repository access.

LibraryApp

- Developed a Spring Boot Library Management system for managing books, members, and transactions, including CRUD operations and book borrowing.
- Technologies: Java, Spring Boot, Spring Data JPA, PostgreSQL, React, Docker.

Tourism Agency System

- Digitalized the daily operations of a Tourism Agency, optimizing customer reservation processes.
- Technologies: Postegro, JavaFX, Java.

Veterinary-System

- Developed an API for managing veterinary clinic operations efficiently.
- Technologies: Java, Spring Boot, Spring Data JPA, Hibernate, Maven.

SKILLS

Programming languages: Java, C#, JavaScript **Web Development:** HTML, CSS, React.js **Testing and Automation:** Selenium **Databases:** SQL
Languages: Turkish (Native), English (Professional Working Proficiency)

COURSE

Full Stack Back-End Development with Docker Bootcamp - <i>techcareer.net</i>	December 2024 – January 2025
Project Management Fundamentals	December 2023 - December 2023
Design Thinking	June 2023 – June 2023
Applied Software Testing Expertise - <i>Bilge Adam</i>	May 2023 - June 2023
A101 Test Automation Practicum - <i>Patika.Dev</i>	October 2022 - November 2022
Coding Principles in C# Bootcamp - <i>techcareer.net</i>	June 2022 - July 2022
Agility & Scrum - <i>Proludus</i>	August 2021 - August 2021
Data Storytelling - <i>Proludus</i>	July 2021 - July 2021
Python - <i>University of Michigan</i>	May 2021 - July 2021
Web-Based Content Management Systems - <i>Elginkan Vakfı</i>	March 2016 - May 2016
